Tab. 1 Print-related specifications

⁽¹⁾: On printing presses with perfector, the printing material thickness depends on the materials used (especially direction of paper travel and bending strength).

⁽²⁾: The maximum printing performance depends on the conditions on site and on the materials used. Deviations may also be due to customer- or market-specific special accessories. If this is the case, the deviations are documented in the press-specific publications.

⁽³⁾: Including pile support plate and pile table.
